EnGarde Email Security Gateway

Threat-Ready Business Email Protection.
Unparalleled Support.

Did you know that you risk your entire system - even your company - if just one employee clicks through to a malicious website because they received a link from a purportedly trusted source?

THE COST OF BREACHES

• A typical data breach costs a business an average of $148/record breached, according to Forbes.

• 48% of all breaches are initiated by malicious or criminal attacks.*

• U.S. companies experience the greatest loss per breach, including in post-breach recovery, reputation and brand loss. *

From The 2018 Cost of a Data Breach Study by the Ponemon Institute, Sponsored by IBM

Unparalleled Business Email Protection

Not all security systems are designed the same. If you think you have checked all the boxes to protect your company and your staff from malcious email, you may still be vulnerable. The current threat landscape requires that an email protection system be vigilant, threat-ready, and able to keep up with increasingly sophisticated attack strategies. You want Guardian Digital's *EnGarde Email Security Gateway.*

EnGarde is a comprehensive, customizable and scalable security-as-a-service solution that offers end-to-end email protection. From implementation to unparalleled 24/7 customer support, we secure your entire email infrastructure. Our team of security experts evaluates your security needs and tailors our solution to your systems, staff and budget. You do not need to be a security systems expert — because we are.

We are proud of *EnGarde* and our long-standing relationships with our clients. You are not just investing in an email security solution. Rest easy knowing that with *EnGarde*, you have a full team dedicated to ensuring your systems are always secure. A swift response coupled with unparalleled support are what you want--and need--in an advanced threat landscape.

Pain-free Implementation, Exceptional Results

"The team consistently showed they were fully committed to getting us up and running as quickly and as seamlessly as possible. Our stringent security requirements were implemented without incident."

- Dave Coder, Network Services Manager, Chicago Stock Exchange

Guardian Digital Provides One Solution, Multiple Layers of Security

For two decades, Guardian Digital has developed cutting-edge secure cyber solutions using our flexible and cost-effective open-source platform, protecting companies of varying sizes globally. Open-source security ensures that your system is always threat-ready. *EnGarde* is the culmination of years of knowedge and experience in the cyber security world and provides unparalleled business email protection.

Each individual tier in our email security solution focuses on a specific area where malware can attack. By working in concert, these layers of security stop cyber intruders from breaching company networks.

Total Email Infrastructure Management and Persistent Real-Time Threat Detection

EnGarde does more than just filter incoming emails. It is an end-to-end managed email solution that protects your business email infrastructure and ensures persistent real-time protection against all cyber threats.

EnGarde delivers the most powerful approach to detecting and eliminating spam and phishing attacks. Guardian Digital has combined the most effective spam-filtering methods with its advanced machine-learning technology to deliver greater than 99.9% protection.

"For over a decade we've counted on Guardian Digital's solutions for a more secure and reliable mail environment. I'm grateful for their years of great service — the staff is professional and prompt and has always had a quick resolution to our mail inquiries or any other issues."

- Sheldon Huey, Best Western International, Senior Operations Manager, Enterprise Email
