Threat-Ready Business Email Protection. Unparalleled Support.

1999

Founded by Dave Wreski, an open-source Internet security pioneer, Guardian Digital provides a protection model that blocks today's most sophisticated threats to email integrity. Guardian Digital has been an open-source and email security innovator since the beginning, and continues to provide email security solutions that are unparalleled in today's marketplace.

OUR TEAM

David Wreski, President and CEO

Kelly Haggerty, Chief Financial Officer

Greg Strange, Vice President of Engineering

Brittany Day, Director of Marketing

Larisa Mendez Downes, Director of Communications

WHAT OUR CLIENTS SAY

"The scalability and security that we now have with our Guardian Digital solution will make future network integration of other ISRO centers simple; and I have no doubt that many will embrace this successful solution."

- Dr. N. Ramani, Visiting Scientist, Indian Space Research Organization

OUR SOLUTIONS

The EnGarde Email Security Gateway solution uses the unparalleled flexibility and security of open-source software to safeguard your business' email assets and your people. Guardian Digital works to create an end-to-end cloud-based email infrastructure solution for your business that is both scalable and customizable.

SAFEGUARDING YOUR BUSINESS

The EnGarde Email Security Gateway provides anti-virus, anti-phishing, anti-spam content security by providing:

-  Multi-layered security protocols
-  Centrally managed cloud-based administration
-  Integrated firewall and intrusion detection
-  Inbound and outbound protection
-  Anticipates new threats and stops them
