

EnGarde Email Security Gateway

Threat-Ready Business Email Protection. Non-Stop Support

“Email security has become a critical concern for our customers. EnGarde meets the requirements AT&T have set up for enterprise functionality and security”

Jeff Rapp

AT&T Asia-Pacific
Solutions Architect

With its two decades of cyber security expertise, Guardian Digital - and its EnGarde Email Security Gateway - is meeting the challenges of today's sophisticated and relentless email threat landscape. EnGarde is “end-to-end” security. A cloud-based, multi-tiered system that anticipates threats and safeguards your business email.

Now that attackers have become so adept at infiltrating businesses, email security needs to become more than just “spam protection”. Threats are constantly changing and evolving. A successful email breach can cost your business money, time, productivity and most of all - your reputation.

EnGarde Email Security Gateway doesn't just filter incoming emails. And it's not a “patch”. It's a real-time solution that constantly learns and updates itself - providing end-to-end control of your email infrastructure. It is protection that is customizable and cost efficient, as well.

What EnGarde Does

EnGarde Email Security Gateway is an intelligent auto-learn system that scrutinizes millions of individual characteristics from each email, quickly utilizing resources of systems around the world to identify threats in real time. Our two decades of email security expertise enables us to immediately extract this information to create this one-of-a-kind, cutting-edge protection. Protection that no other vendor can provide.

What We Provide

“We’ve seen more and more of these email attacks in the weeks and months prior to implementing the leading-edge solution by Guardian Digital. You can tell users not to click on links or open attachments from senders they don’t know, but we needed a multi-tiered strategy. Guardian Digital delivered, and followed up with incredible support.”

Omar Orellana

Director of Technology,
Sansone Auto Mall

State-of-the-art email protection. Decades of email systems expertise. Engineers who can immediately adapt and update your email to protect against the latest forms of cyber threats. EnGarde is the most vigilant approach to email security available.

- ✔ Support 24/7/365 that goes above and beyond simple “tech support”
- ✔ Real-time, constant monitoring for threats to your email
- ✔ Effective defense from spam, phishing, and other advanced threats
- ✔ Zero-hour outbreak control that protects against new, unknown threats
- ✔ Advanced graphs & reports that provides increased visibility & accountability
- ✔ A scalable cloud-based system that simplifies deployment
- ✔ Policy-based encryption that seamlessly protects confidential communications
- ✔ A unique, collaborative input program- the only email security program of its kind

This innovative, multi-tiered email defense system gives administrators all the tools necessary to filter out unsolicited or inappropriate emails, thwart email-borne viruses, and enforce corporate email policy regulations.
